CANADIAN PHARMACEUTICAL  
SCIENCES FOUNDATION

## DONATION & PLEDGE FORM

The CPSF comes at a pivotal time for the pharmaceutical sciences sector in Canada as the current investment in the next generation of pharmaceutical researchers has declined to a critical level.

Pharmaceutical scientists in Canada have a rich history of significant discovery, saving the lives of thousands of Canadians, improving the quality of life for thousands of others, saving billions in healthcare, and otherwise contributing to Canada's social and economic growth.

The CPSF is dedicated to initiatives that promote the discovery, development, regulation, and manufacture of drugs, biologics, and natural health products, by attracting and providing resources used to advance research, education, and training. It seeks to train

and empower pharmaceutical scientists in a manner that positively impacts the pharmaceutical sciences and creates solutions addressing vital needs found in the treatment of disease and the promotion and preservation of health.

The Foundation will provide financial support to graduate students in the pharmaceutical sciences, support early career pharmaceutical sciences researchers, aid in the development of professional training and continuing education, and support the advancement of public education of the pharmaceutical sciences in Canada. Much of the support of the Foundation will be directly through Canada's universities where the adjudication and autonomy of significant, independent research and the public good are enshrined.
